Docket No.: 7982-A

SHAVING SYSTEM

5

Mingchih M. Tseng

ABSTRACT OF THE INVENTION

10

✓ ~~In accordance with one aspect of the invention, there is provided a shaving unit that~~
comprises at least one blade and a skin engaging member that has a surface for engaging the
user's skin adjacent the blade edge. The shaving unit may be of a disposable cartridge type
adapted for coupling to and uncoupling from a razor handle or may be integral with a handle
so that the complete razor is discarded as a unit when the blade or blades become dulled.
15 The blade edge (or edges) cooperate with skin engaging surfaces to define ^{a shaving} ~~having~~ geometry.
The skin engaging member is comprised of an elongated sheath ^{also} made of a mixture of water
insoluble matrix material and an effective amount of shaving aid material and a rigid core ^{all} ~~material~~
extending axially through out said sheath. The axial position of the core need not be
20 through the central axis.
